"Education should not be the filling of pail, but the lighting of a fire."

W.B. Yeats

INTRODUCTION

Education is considered the backbone of our economy. The content and delivery of teaching determine the career of individuals and their success throughout their lives. It reveals the way of solving problems, working with others and looking at the world around us. In today's context, education becomes even more critical for developing new ways of teaching pedagogy and recognizing the importance of the next generation of creative thinkers and innovators. However, there is a gap between the potential of meaningful education and what the learners are learning. Many educators, trainers and teachers still cling to the traditional and increasingly ineffective methods of teaching. The creation and adoption of innovative ideas in education are often slow.

Innovative teaching pedagogy becomes more critical to serve students better and to educate them about creative thinking. Innovative critical thinking and problem-solving skills ignite a passion for learning and impart decision making capability. These are important for learners to succeed in the innovation economy.

Many teachers, trainers, professionals and institutions are making efforts in this area and exploring innovative pedagogy in their classes and training sessions. SVSU felt that the pedagogy of these individual teachers, trainers, professionals and teacher trainers need to be recognized by giving them awards at the national level. Shri Vishwakarma Skill University has instituted an award titled "Vishwakarma National Skill Excellence Award for Innovative Teaching Pedagogy in Higher Education" for individual teachers, trainers and teacher trainers attempting innovations in their teaching pedagogy.

The award is institutionalized by Shri Vishwakarma Skill University through a two-level award for college, university teachers, NSQF trainers and corporate trainers and teacher trainers for adopting innovative teaching Pedagogy that focuses on developing the following skills among students and trainees.

Key Skill Area of Innovative Pedagogy Methods

This Award shall be conferred on the participants after competing at two levels

MEANING OF INNOVATION

The definition of innovation here includes:

- Process used implementing an idea for improvement of teaching learning process
- A strategy, method or device which brings improvement in teaching learning
- An idea that brings improvement through the use of some techniques

OBJECTIVES OF THE AWARD

The main objectives of the award are:

- Enhance the skills as mentioned earlier of the students; sensitize teachers, trainers and teacher trainers about the potential of innovative teaching pedagogies for improvement of teaching-learning.
- Encourage teachers, trainers and teacher trainers to explore innovative ideas and practices for the development of different areas of higher education.
- Encourage teachers, trainers and teacher trainers to identify problems they face in their teaching-learning process and adopt a realistic approach to find their solutions.
- Create an environment in colleges, universities and institutions to ensure the sustainability of innovation.
- Provide a forum to teachers, trainers and teacher trainers to share their innovative ideas with all the stakeholders.

AWARDS

The award shall comprise of an e - certificate of appreciation, a trophy to be awarded each year on the foundation day of SVSU and an invitation as a resource person in SVSU's one program, free access to online SVSU digital library and other knowledge resources for one year.
